INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/050178

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-30	YES
	Claims		NO
Inventive step (IS)	Claims	1-30	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-30	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following document:

D1: DE 199 27 555 A (KOENIG & BAUER AG), 21 December 2000
(2000-12-21)

1. Independent claim 1

1.1 Document D1, which is considered to be the closest prior art, discloses the following (the references in parentheses are to D1) in the words of claim 1:

A printing unit in a rotary printing press having a first cylinder (1) and a second cylinder with a compressible surface (blanket cylinder 2), with bearer rings that co-operate in an impression "ON" position (figure 2), a radius (rs1) of the bearer ring associated with the first cylinder (1) being greater than a radius (rs2) of the bearer ring associated with the second cylinder (2) (column 1, lines 28 to 29).

1.2 The problem addressed by the present invention can thus be seen as that of how to increase the service

life of the drives (for example, by reducing the overload on the motors) and make the conveyance behaviour more reliable.

- 1.3 There is nothing in the prior art that might suggest to a person skilled in the art the proposed solution, according to which the effective radius of the barrel portion of the first cylinder is greater than the radius of its bearer ring. Claim 1 therefore appears to be inventive (PCT Article 33(3)).

2. Independent claims 2 and 9

The subject matter of claims 2 and 9 is the same as that of claim 1, and therefore the comments made above also apply. Claims 2 and 9 appear to be inventive (PCT Article 33(3)).

3. Dependent claims 3-8 and 10-30

Since independent claims 1, 2 and 9 appear to be novel and inventive, dependent claims 3 to 8 and 10 to 30 (which refer back to independent claims 1, 2 and 9) are clearly also inventive (PCT Article 33(3)).
